Basal Healthcare is a young medical devices company started in the year 2017. Basal team comprises of highly trained and motivated professionals of the Indian healthcare industry who have honed their skills at some of the best medical devices/pharmaceuticals/ medical diagnostics companies.

Team members have an expertise in handling functions like sales and marketing-new business development, product promotion, key account, tender, KOL, people and P& L management.

This highly experienced and motivated team is our main strength and that would be the key differentiator between Basal Healthcare and other companies operating in the medical devices distribution domain of Indian healthcare market.

Our critical focus areas are Wound Care, General Surgery, Gynecology, Critical Care, Anesthesiology and diabetes/ hypertension related devices.
